

DISPOSABLE EAR PLUGS

Certified by Global Mark, the disposable earplugs provide all round protection.

Both corded and uncorded versions are disposable and made from a soft PU foam.

The bright orange colour makes them easy to find.

The tapered ends ensures it is easy to insert into your ear canals.

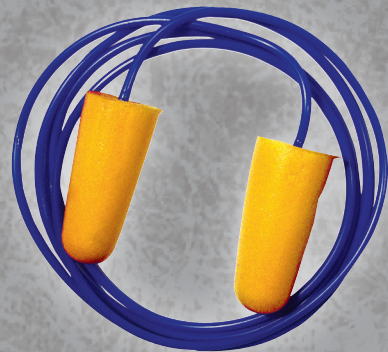

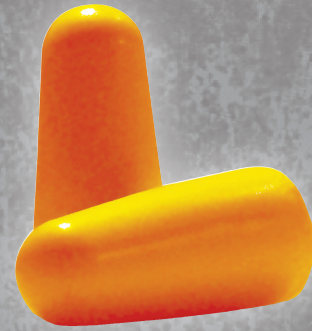

The $SLC_{80} = 27\text{dB}$ / Class 5 earplugs are safe to use in up to 110 db(A) assuming an 85dB(A) criterion.

You can choose from different pack sizes to suit your work environments.

The handy 10 pairs pack is great for the glove box or tool box.

The dispenser boxes are great for most workshops.

The uncorded earplugs are also available in a bulk 500 pack. These are great to top up existing dispenser machines.
